Stem Cells and Osteoarthritis

Guest Editors: Nicolai Miosge and Mary B. Goldring

Contents

Editorial	135
Regulatory Mechanisms of Chondrogenesis and Implications for Understanding Articular Cartilage Homeostasis <i>Chisa Hidaka and Mary B. Goldring</i>	136
Biology of Mesenchymal Stem Cells <i>Franz Jakob, Catarina Limbert, Tatjana Schilling, Peggy Benisch, Lothar Seefried and Regina Ebert</i>	148
Mesenchymal Stem Cells and Their Cell Surface Receptors <i>Denitsa Docheva, Florian Haasters and Matthias Schieker</i>	155
Adult Stem Cells for Cartilage Tissue Engineering and Regeneration <i>Faye H. Chen and Rocky S. Tuan</i>	161
Migration of Local Progenitor Cells as Therapeutic Target in Knee Osteoarthritis <i>R.E. Brenner and J. Fiedler</i>	171
Animal Models of Osteoarthritis <i>Christopher B. Little and Margaret M. Smith</i>	175
Knock-Out Mice in Osteoarthritis Research <i>Aurelia Raducanu and Attila Aszódi</i>	183
Clinical Aspects of Autologous Chondrocyte Transplantation <i>Hans-Michael Klinger and Mike H. Baums</i>	193
Current Concepts in Meniscus Tissue Engineering <i>Anja Drengk, Klaus Michael Stürmer and Karl-Heinz Frosch</i>	196
Does Osteoblast to Adipocyte Differentiation Play a Role in Osteoarthritis? <i>Heide Siggelkow</i>	202
Angiogenesis in Osteoarthritis <i>Norbert Schütze</i>	206
The Role of Progenitor Cells in Osteoarthritis <i>Jenny Kruegel, Nicolai Miosge* and Sebastian Koelling</i>	210
